Professional Profile

Finance-focused engineering student with hands-on experience building financial models, valuations, and quantitative tools. Combines a technical foundation in software and data analytics with a growing specialization in equity research, corporate finance, and valuation — applying an engineer's rigor to financial analysis. Seeking to pursue quantitative finance, valuation, or corporate finance roles where technical fluency is a genuine advantage, not a distraction.

Education

Bachelor of Engineering (B.E.) — Information Technology

Thakur College of Engineering and Technology
Duration: 2023 – 2027 | CGPA: 8.2 / 10.0

Relevant Coursework: Probability & Statistics, Data Analytics, Corporate Finance, Financial Accounting, Database Management, Linear Algebra

Finance & Valuation Projects

Equity Research & Valuation | Ferrari N.V. (NYSE: RACE)

- Built an integrated 3-statement model and 10-year DCF valuation for Ferrari N.V. using public filings, deriving WACC via CAPM and validating model integrity to <0.01% variance
- Performed comparable company analysis (LVMH, Hermès, Porsche AG) using EV/EBITDA and P/E multiples, supported by WACC × terminal growth sensitivity analysis
- Authored a comprehensive equity research report reconciling DCF and comparable company valuations, culminating in a Hold recommendation

PriceLy — AI-Powered Smart Deal Advisor (Prototype)

- Designed a buy-now-vs-wait decision framework for high-value electronics purchases, weighing price trend, opportunity cost of waiting, and delivery/convenience trade-offs Built the recommendation logic around a quantified cost-benefit model rather than static rules, translating consumer pricing data into an actionable decision signal
- Collaborated within a 3-member team to design, validate, and iterate the model against real pricing data

Work Experience

Intern — National Payment Corporation of India, Subsidiary (NBBL – NPCI Bharat BillPay Limited)

July 2026 – Aug 2026

- Built and shipped an AI-powered evaluation system now in production, cutting report turnaround from 30–60 minutes to seconds — a workflow efficiency gain adopted company-wide
- Designed a rules-based decision engine handling dynamic inputs, exposed via REST APIs for cross-team use
- Automated data logging and reporting, reducing manual processing overhead across the evaluation pipeline

Other Projects

Lumora — AI-Powered Personal Finance Platform | Co-Founder

- Co-led development of a personal finance platform spanning budgeting, portfolio management, cash flow analysis, and financial planning modules
- Designed the portfolio and cash-flow analytics logic, translating raw transaction data into forward-looking financial insights
- Owned end-to-end product development, from financial logic design to AI feature integration

Leadership Experience

Director — Community Service, Rotaract Club of TCET 2024 – 2025

- Led 20+ community initiatives benefiting 500+ individuals
- Coordinated projects across 10+ schools and 5+ NGOs while managing 50+ volunteers
- Increased volunteer participation by 40% and inter-club engagement by 60%

Certifications

Finance

- Introduction to Financial Accounting — University of Pennsylvania
- Introduction to Corporate Finance — University of Pennsylvania

Analytics & Technology

- Data Analytics Foundations — DeepLearning.AI

Business & Marketing

- The Complete Digital Marketing Guide — 27 Courses in 1

Technical Skills

- **Finance:** Financial Modeling, Valuation, Financial Statement Analysis, Corporate Finance, Microsoft Excel
- **Programming Languages:** Python, C++, Rust, JavaScript
- **Databases & Tools:** SQL/MySQL, MongoDB, Git, GitHub

Core Competencies

- Leadership & Team Management
- Analytical Thinking
- Strategic Problem Solving
- Stakeholder Communication
- Cross-Functional Collaboration
